ABR1307 14123

SUPPORTING CARER'S NEEDS

Manual handling is any activity that requires the use of force exerted by a person to lift, carry, lower, push, pull, move or hold any item, including a person. It also includes work involving repetitive activities, sustained muscle exertion, and fixed postures.

Injuries to carer's in healthcare, aged care, rehabilitation and disability services due to the handling of people are a major risk. However, these injuries are preventable.

Aidacare provides a range of assistive equipment that may help to reduce, or eliminate the risk of injury from manual handling by a carer.

SWL – Safe Working Load is the manufacturer's recommended maximum weight load for a product. Allowance should also be made for fluctuations in body weight and additional items that may be carried by the equipment user, such as equipment accessories or bags.

NOT QUITE SURE?

Do you need help with product selection and sizes? Please contact Aidacare on 1300 133 120. For Therapist Solutions please enquire about how else we can help you.

For a full range of assistive equipment that may support carers, please scan the QR code.
