

- ≡ Superior pressure distribution and postural stability in a high performance, light weight cushion

JAY® J2™

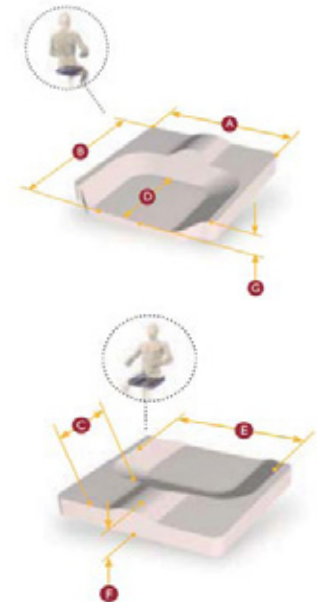

The JAY J2 cushion combines JAY foam, a JAY Flow fluid pad and various cover choices to provide outstanding comfort. The Jay J2 cushion is most suitable for clients who have moderate to aggressive postural needs, and require a high degree of skin protection .

Foam and Fluid Composition

- A firm, anatomically correct pre-countoured foam base, that is closed cell and extremely light weight, creates a foundation for postural stability.
- JAY Flow™ fluid Tripad™ conforms to bony prominences, distributes pressure more evenly and reduces peak pressures. The base and fluid pad can be customised to accommodate fixed postures or to correct flexible postures.
